Keith is a registered architect with over 40 years of planning and design experience at airports around the world. His experience in aviation includes project and program leadership with an emphasis on terminal design and planning. Over the course of his career, Keith has directed a substantial portion of Gensler's aviation engagements at greenfield and renovation/expansion projects leading to constructed terminal work in both U.S. and globally including small (Carlsbad: 18,000 sf), medium (John Wayne: 280,000 sf) and the large (Incheon Terminal 2: 4,100,000 sf). Most recently he has provided leadership on over $3 billion in ongoing major terminal projects at San Diego and at LAX for LAWA, American Airlines and Delta Airlines.

MBA 1985, Finance-Management Science, University of California, Los Angeles
